

David H. Prouix (#3153)

The cover shown on the top of the next page (page 50) illustrates the use of perfins pattern H52 by the Robinson Electric Company of Buffalo, NY. This type of item causes catalog editors to pull out their hair. Fortunately, in this case, there is little possibility of a cataloging error. The user of perfins pattern H52 (H/Co) has been previously identified as the Holeproof Hosiery Company of New York, NY. The catalog correction was issued sometime after the initial distribution of *The Catalog of United States Perfin*s by Balough in 1979.
